

Tommy-Invest Electronic Ltd. has 20 years of experience in the production of electronics. During that long time we went through several reorganizations and developments, which resulted in high production quality, favourable price level, precise delivery dates and flexibility all around of our production.

We carry out our production tasks with 300 employees, completed with a separate department for development and quality control. Our company always put great emphasis on the quality, on the control and guarantee of the products leaving our factory.

The industrial park at Szécsény extends over an area of 90 000 m² and the industrial halls are over 12 000 m² in size. The clear and simple organization of the management makes us possible to react very quickly and efficiently to all the demands of our customers.

The scope of our activity:

Assembly of electronic circuits, axial, radial, PCB, SMD, and manual assembly, SMT, BGA, optical control

Production of different parts, such as: inductive elements, filters, transformers, choke coil

Supply and develop of different components: ferrite powder cores, ring cores, toroids, E, U-cores, nanocrystal, SMT components

Production of magnetic technologies: record, play, erase, writing and reading, magnetic heads for card reading and writing systems

Fine mechanic assembly
Injection moulding, metal pressing

Assembly of complete equipments
Wage work

Product information on www.ti-electronic.com

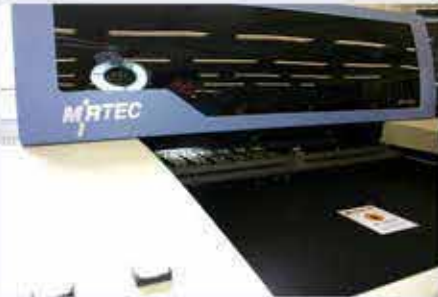

Our new automatic production line

Our certificates

ISO 9001

- Assessment of products and production according to the needs of the customers (UL, VDE)
- Control processes
- Control of incoming goods, contacting suppliers
- Control between two operations
- Control of the finished product
- Reports from customers - feedback - measures
- Measures based on internal tests in order to improve quality
- Category "A" of suppliers from the pharmaceutical company Roche (medical diagnostics)

Measurements and tests

- Visual control
- AOI automatic optical control equipment
- IC-T test
- FC-T function test
- X-ray control
